L'Amoreaux
Nursery Company

Two year-old Apple Trees in our Nursery.

Schoharie, N. Y.

Descriptive Catalogue,
1908.

STATE OF NEW YORK, }
Department of Agriculture. }

No. 924.

**CERTIFICATE OF INSPECTION OF NUR-
SERY STOCK.**

This is to Certify that the stock in the nursery of L'Amoreaux Nursery Company of Schoharie, County of Schoharie, State of New York, was duly examined in compliance with the provisions of Section 83 of the Agricultural Law, and it was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose scale or other dangerously injurious insect pest or pests. This certificate expires September 1, 1908.

Dated, Albany, N. Y., September 1, 1907.

C. A. WIETING,
Commissioner of Agriculture.

INTRODUCTORY.

In presenting this, our Special Berry Catalogue, it is hardly necessary for us to devote much space to introduction. It is and has always been our aim to supply our customers with the best plants that can be grown. Our stock of Strawberry, Raspberry, Blackberry and Asparagus plants is extra fine, being strong, thrifty and well rooted and free from disease. Our plants are propagated from beds that have never borne fruit, so are free from disease and exhaustion from fruiting, and customers can depend upon getting nothing but strong, well rooted plants. Value as well as price should be considered when purchasing trees and plants. We cannot sacrifice the quality of our products to compete with growers who send out inferior stock. If you have perfect plants to start with, grown strong and hardy, you are pretty sure of getting big crops. Our facilities for filling orders are most complete, and every order will receive our personal and prompt attention.

We are grateful to our friends for their liberal patronage of former years and solicit a continuance of the same.

L'AMOREAUX NURSERY COMPANY.

Read Before You Order.

YOUR NAME, POST OFFICE AND STATE should be distinctly written, and be sure that neither is omitted. This may seem to many an unnecessary request, yet we receive many letters, and sometimes orders with remittances, with either signature, post-office or state omitted. No matter if you write several times, always give full name and post-office address.

TERMS CASH IN ADVANCE. Goods are sent by express C. O. D., if desired, providing one quarter of the amount is sent with order; but this is a somewhat more costly mode of remitting. Better send the money right along with the order. We cannot ship C. O. D. by freight.

THE PRICES in this Catalogue abrogate previous quotations and are subject to change without notice. The prices affixed are for the quantities specified, but half-dozen, fifty and five hundred of a variety will be supplied at dozen, hundred and thousand rates respectively, unless otherwise quoted.

When comparing our prices with others, you must remember we pay the charges on all shipments amounting to \$4 00 or more.

ERRORS—Immediate notice should be given us of any error in filling out an order, so that we may rectify the mistake or give a satisfactory explanation, which is cheerfully done in all cases.

OUR GUARANTEE—Our plants are warranted true to name, and of grade represented. Should any stock not prove true to name, we will either refund the purchase money of same, or replace the stock true to name, free; but are not liable for further damages; and while we exercise great care to prevent mixture, the above is to be the condition on which all stock is sold.

Strawberries.

The Strawberry may be grown to perfection on any land that will produce a crop of potatoes. Strawberries should not be planted on newly ploughed old sod ground, as the white grubs generally are so bad and will, very likely, destroy a great many plants. You will have little or no trouble with this pest if your ground has been ploughed the previous year. The soil should be enriched with manure or fertilizer and should be thoroughly barrowed until it is in first class condition. For field culture set the plants in rows about fifteen inches apart in the rows, have the rows four feet apart. For garden culture they may be planted closer, say about one foot apart in the row and have the rows three feet apart. If you are to plant in a large way we advise making a furrow about six inches deep, set the plants against the land side of the furrow, let the roots run down as far as they will, keeping the crown at the surface, draw the soil to the plant with the hand and firm it well. Always have the roots wet when setting. Plant the pistillate varieties near the staminate varieties and be cautious in selecting varieties that bloom at the same time.

We have grown and fruited the Strawberry for many years, and have had many varieties unworthy of cultivation, these we have discarded from our list entirely. The sorts we now have we can recommend to our patrons with the utmost confidence.

Pot Grown Strawberry Plants.

We have made a specialty of growing Pot Grown strawberry plants for the past twelve years, carefully observing the best means to grow and develop these plants that they would give our patrons entire satisfaction. Owing to the favorable location and the specially adapted soil of our beds, together with our improved methods of propagating, we can supply our customers with plants far superior to those generally offered. We make but one plant from a runner, keeping all runners cut off that start from the pot, this makes the strongest plant possible to produce. Our pot plants will be ready about July 15th. Plants set in August or September will bear a full crop the next season, and are well worth the difference in price over common layer plants. Those varieties that are marked with a x we can supply in pot plants. Should you need 1000 or more pot plants write for special price, naming the varieties you desire.

How to Set Pot Plants.

We have prepared the following brief directions for our customers who have not had the experience in planting and caring for a bed of pot grown strawberries, in order that they may secure the best possible results. Pot grown strawberry plants, as well as other pot plants, can be transplanted at any time of the year, even in the hottest weather, with entire safety. In the first place you should have your ground in first-class condition, having previously added some good barn yard manure or wood ashes. Have the rows about three feet apart and set the plants two feet apart in the row. Make a hole with your garden trowel and after soaking the plant by holding it in a pail of water for a short time, squeeze the ball of roots and earth so as to loosen it some, and set so the crown comes even with the surface of the soil, firm the soil to the roots, but do not pack it. The plant will not even flag or wilt, but will start at once to grow and throw out many new runners, these should not be allowed to grow. If the weather should be dry the plants would be greatly benefitted by watering occa-

Asparagus—We send a great many orders by mail, never knew of a root being spoiled on way to the buyer. Price 25c per doz., postpaid.

All of the Raspberries and Blackberries described herein are good ones. We have discarded those unworthy of cultivation.

sionally in the evening. A great many think that the more young plants that are allowed to grow the more berries they will have. This is a vast mistake. In our many years of experience we have found that berries of a great deal better quality and more of them can be had by keeping all runners cut. This induces the plant to stool out, and the next season it will throw out many fruit stems. We have known instances where more than two quarts of berries have been picked from a single plant treated as above directed.

Description of Varieties.

Abundance.

Beyond doubt the most prolific berry in existence today. In yield we will put it up against any variety we know of. It has no equal. It was grown from seed of Bubach fertilized with Lovetts. The plants are good growers, making many runners. Foliage looks very much like Brandywine. Berries very delicious, about the size of Lovetts and will yield a third more than that well known variety side by side. It has a perfect blossom, medium to late. If any of our customers wish to try it we can furnish plants at the following prices: 30c per doz; ~~75c per 100; \$3.00 per 1,000.~~ Pot grown, 40c per doz; ~~\$3.00 per 100.~~

Excelsior.

The earliest berry in existence. Good size, strong grower, firm and good color. Beyond doubt the most valuable early berry introduced. It is well known all over the country as the great money maker. Price, 25c per dozen; 60c per 100; \$3.00 per 1,000. Price of pot-grown plants, per doz; per 100.

Brandywine (Per.)

This variety is well known, and has been quite thoroughly tested in many sections. It has been steadily increasing in favor here, and is now regarded as one of the best late sorts known. It does not yield as heavily as some of the second early varieties, but is equal to any of the late sorts, and the berries are all large, well colored and firm. The bulk of the crop ripens very late. It is rather later than Enhance and far more attractive in appearance. Where lateness is desirable, it has quite generally proved satisfactory. Price 25c per dozen; 60c per 100; \$3.00 per 1,000. Pot plants, 40c per 12; \$2.50 per 100.

ALL LAYER STRAWBERRY PLANTS SENT POSTPAID BY THE DOZEN. IF LARGER QUANTITIES ARE WANTED BY MAIL, ADD 15c PER 100 EXTRA TO PAY POSTAGE. SEND US A TRIAL STRAWBERRY ORDER-WE WILL SHOW YOU SOME FINE PLANTS.

Jessie (Per.)

This variety is named by nearly all strawberry growers as one of the best in a collection of three or four varieties for home and market. Its season is early to medium. Jessie is a perfect strawberry for those having only a garden spot. Perfect flowering. On rich, loamy soil it is very productive, and the fruit is very large. Price, 30c per dozen; 60c per 100; \$3.00 per 1,000. Pot plants, 40c per 12; \$3.00 per 100.

*The Cardinal Raspberry
is all we claim for it. We
have fruited it four years.*

*The London Market Currant
is a money maker and
a sure cropper.*

Michel's Early (Per.)

As large and firm as the Crescent, ten or twelve days earlier. Plant the hardiest of all known. Growing side by side with twenty other varieties, nothing approaches it in plant growth. Price, 25c per dozen; 60c per 100; \$3.00 per 1,000. Pot plants, 40c per doz; \$2.75 per 100.

Climax (Per.)

This valuable new early variety comes from Maryland and was grown from seed of Bubach, crossed with Hoffman. In time of ripening it is but a few days later than Excelsior and almost as large as Bubach, while in yield, is far ahead of this old favorite. Each berry is a perfect specimen. No misshapen or knotty fruit to sort out or bother with. Yields are reported from its native state from 300 bushels to 500 bushels per acre. Another very valuable point is its firmness, being a valuable berry for long shipments. Too much cannot be said for this valuable new production, and no one should fail to have it in their collection of valuable new varieties. Price 25c per doz; 70c per 100; \$3.00 per 1,000. Pot plant, 40c per doz; \$2.75 per 100.

Stevens' Late Champion (Per.)

Originated in New Jersey. Plants of more than ordinary vigor; a good runner; perfectly healthy; color bright. A fine looking berry. Ripens after most other varieties have gone. We consider it the best late strawberry we grew last season. Any one who wants a good, late kind should plant Stevens' Late Champion, as it is properly named. Price, 35c per dozen; 90c per 100; \$5 per 1,000. Pot plants 40c per doz; \$2.75 per 100.

Clyde (Per.)

This is perhaps the most popular new strawberry ever introduced, seeming to do equally well in all parts of the country. The Clyde ripens early, is large as Bubach and much firmer. The plant is very vigorous and healthy, foliage light green in color. It makes strong plants, with excellent roots reaching far into the soil and thus being able to withstand severe drouth. Price, 25c per dozen; 60c per 100; \$3.00 per 1,000. Pot plants, 40c per doz; \$2.75 per 100.

Lovett (Per.)

One of our best pollenizers. It is certainly a valuable acquisition to the list of good berries. Fruit large, solid and firm, excellent for market, and first-rate for home use also. It has a healthy, vigorous plant, ranks above medium in productiveness. Price, 25c per dozen; 60c per 100; \$3.00 per 1,000. Pot plants 40c per 12; \$2.50 per 100.

Beder Wood (Per.)

It ripens about three days behind Michell's Early, and a full week ahead of Crescent; gives heavy pickings from the start, and holds out until the rush of midseason. Price, 25c per dozen; 70c per 100; \$3.00 per 1,000. Pot plants, 45c per 12; \$3.00 per 100.

Gandy (Per.)

This is not a new berry, but one whose value as a profitable market sort has been overlooked. Its season is very late, and is in its prime when most other sorts are gone, or so nearly so as to be very inferior. The fruit is large, handsome and uniform, and makes an excellent showing on the market. While it is claimed by many to be a shy bearer, we find that it yields a fair quantity of berries the first year, and improves with age until it becomes four or five years old. In our markets we find that the price always advances in the latter part of the season, when most of the berries are gone. Prices 30c. per dozen; 70c. per 100; \$3.00 per 1,000. Pot plants, 45c. per 12; \$3.00 per 100.

Glen Mary (Per.)

Vigorous and prolific. Berries large, mostly irregular, often flattened and ribbed, but seldom cockscombed; dark scarlet, glossy, beautiful, although an occasional specimen is not well colored. Flesh light red, moderately firm and of good quality. Season medium to late. Considered by many growers as one of the best large varieties. In productiveness it seems to excel almost all varieties of its season, although a very rough berry, its immense size makes it a valuable sort. Price 25c. per dozen; 65c. per 100; \$3.00 per 1,000. Pot plants 40c. per 12; \$2.75 per 100.

Marshall (Per.)

Of the very largest size; color very dark rich crimson to the core; flesh fine grained and of a delicious flavor, and with the peculiar aroma of the native wild strawberry, from which it is thought to have sprung. Price, 25c. per dozen; 60c. per 100; \$3.00 per 1,000. Pot plants 40c. per 12; \$2.80 per 100.

Bubach (Pistillate.)

One of the most reliable fruiters we have. Plants are strong, rampant, healthy growers, one of the best for market. The fruit is firm, of good flavor, dark rich color, and pleasing appearance. Season second early. The Bubach has taken a very prominent place in strawberry culture. This berry is planted largely with the Sharpless, the size, color and shape being much alike. It can stand the severest droughts, having very large foliage to protect its fruit. Its attractive appearance and large size makes it a valuable berry for commercial purposes. Price per dozen 30c.; 70c. per 100; \$3.50 per 1,000. Pot plants 45c. per 12; \$3.00 per 100.

Bismark (Per.)

To those familiar with the Bubach, nothing further need be said, since Bubach has been a favorite berry and more plants have been planted than of any other. Bubach has two defects which Bismark corrects. Bubach is a pistillate, requiring other varieties to be planted near it, while Bismark is self-fertilizing. We have in Bismark an extraordinary large berry, gloosy, fine color, good shape and good quality, with vigorous plants full of vitality. Price 30c. per dozen; 70c. per 100; \$3.50 per 1,000. Pot plants 45c. per 12; \$3.00 per 100.

Raspberries.

Two new purple caps Raspberries that are far ahead of anything else in productiveness, the Cardinal and Haymaker.

The New Cardinal Raspberry.

This wonderful berry is a surprise in the fulness of its merits—its great growth, extreme hardiness, and the exceeding productiveness of its choice red, rich, pure-flavored berries. It will pay. It is not a novelty, but a variety of great merit. The new Cardinal will grow ten feet high, and bears in proportion. Leading horticulturists who have seen this berry say that it is one of the wonders of the century, so far exceeding all others as to put it entirely beyond comparison. Judge Wellhouse, president of Kansas State Horticultural Society, said at the meeting of the society that the introduction of the Cardinal Raspberry would add millions to the wealth of the farmers of the country because of its inherent great vigor and exceeding productiveness. Price, 10c each; 40c per dozen \$1.50 per 100; \$14.00 per 1,000.

Don't Forget

That we grow just as fine trees as we do plants
If interested send for our descriptive catalog.

Haymaker.

This valuable new raspberry is certainly the greatest acquisition of years in raspberries of its class. From actual figures, Haymaker returned a net profit of over \$300 per acre last year. Growers coined money from it. The Haymaker is a purple cap, not so dark as Columbian or Shaffer, and much larger and firmer than either of those varieties, never crumbles and stands up well in shipping. It is a berry to grow for either home use or market. The originator has found it the most profitable berry ever raised for market and has never yet been able to supply the local demand. Recommended by experiment stations and leading Horticultural Societies everywhere. It certainly is a leader. Price, 10c each; 40c per dozen; \$1.50 per 100; \$14.00 per 1,000.

Columbian (Purple Cap).

The Columbian is a vigorous grower, with large fruiting canes, fully as large as the Shaffer, which is the most rampant grower we have yet seen. In quality it is an improvement on the Shaffer, being sweeter when ripe and of high flavor.

It is a wonder of productiveness. Twenty-five plants of this variety will furnish enough fruit for a large family through the season, besides you will have a great plenty for canning purposes.

Plants, 3 for 15 cts.; 12 for 40 cts.; 100 for \$1.50.

Shaffer's Colossal (Purple Cap.)

The canes are strong, hardy and productive of large, handsome fruit, the last of the berries even larger than the first. It is a valuable addition to the cap family and especially valuable for preserving.

Price, doz., 30 cts.; 100, \$1.25

Red Raspberries.*Ruby.*

This early new berry is just what fruit growers have been looking for. In the Ruby we have earliness, vigor, hardiness, large size and productiveness. Qualities that will give it a foremost rank. It has been grown commercially for six years and to-day stands ahead of all others as a berry for the growers to plant for profit. The fruit is of large size, a good bright color and firm. An excellent shipping berry. Do not fail to plant the Ruby 2c per 12; \$ per 100; \$ per 1,000.

King.

The earliest Red Raspberry on record. It is the early Red Raspberry that makes the big money—often sell for 25c per quart. You want to add this one to your collection.

"Round, medium size; light crimson colored; firm and of excellent quality. A seedling of Thompson and ripens about the same time, but larger and more productive."

King is in a class by itself. Nothing compares to it in yield, beauty, firmness or size. Supply very limited, order at once. Our plants are genuine. Price, 75c per dozen; \$2.00 per 100; per 1,000.

Three New Red Raspberries.

We endeavor to procure for our customers the very best of new fruits, and each season endeavor to offer the best of the new varieties. We feel quite sure that HERBERT, EATON and RUBY will surprise our planters who want only the best of everything.

THE NEW CARDINAL RASPBERRY

The Triumph of the Century.

Most Hardy, Greatest Vigor, Best Quality and Profit.

By Comparative Tests the Most Productive Raspberry Grown.

The BERRY
for the Million.

VREDENBURG & CO.
ROCHESTER N. Y.

The New Cardinal Raspberry.

Its Origin, Character and Evidence.

A SURVIVAL OF THE FITTEST.

THIS most promising raspberry is another natural product of Kansas. It is not a hybrid, but a result where nature combined its best in one little seed that produced the first Cardinal raspberry plant; it also germinated that seed in its own way, not as under the pet care of an expert gardener, who would control the temperature, moisture, sunshine and weeds, but it came up in a neglected clump of Gregg raspberry bushes, and there showed its make up by growing far above them, and producing its great crop of red berries in contrast to the few Greggs beneath them. When first seen by the owner the Greggs were dug out and the Cardinals had the room.

ITS CHARACTER.

The make up of trees and plants indicate what they may make. The size of raspberries and their hardiness are shown by the shape and quality of the leaves. To see a Cardinal Raspberry plant is to see the embodiment of extreme hardiness and vigor of the *Rubus* family.

Its growth is of the strongest, canes growing fifteen to twenty feet, and making from ten to fifteen canes from one hill or plant. They need more room than is allowed other kinds in field culture. The canes are of very hard wood, with a red bark and a very few small thorns, one between each leaf—practically thornless. It propagates from tips.

The young canes are never broken by winds in early spring, and after the first year they are upright. Its leaves are thick, short, broad and deeply wrinkled, entirely free from all traces of anthracnose or other diseases. They are of a dark green color, and stay on all summer and fall till severe cold in December. The leaves staying on during the growing season ripens the wood so they are hardy to stand all the changes and cold the country has endured since its settlement, and yet produce those amazing crops of rich, plump berries.

It stood the cold of 35° below of the winter of 1899 without the least injury; also in 1895 the summer was most fatal to raspberries. It was so dry in August that the old kinds of raspberries all stopped their growth, then in September rains came and warm weather, and again they started a new growth, till a cold spell in early winter caught them in full leaf, and most kinds were killed outright, others were badly injured, but the Cardinals were not injured and produced their usual large crop of choice berries.

Its productiveness is a surprise to fruit growers. The first twelve plants were set in vacant places in a row of the Kansas, being a year younger, but that was no hindrance, as they produced three to four times as much as the Kansas did. The fruiting spurs on bearing wood are a foot or more long, and new ones come from near the stump two or three feet long, loaded from the bottom up, and the fruit is well up for quick picking.

The berries are large, dark red, firm as to texture, with an agreeable, pure rich flavor, which is brought to its highest perfection when canned or cooked in pies. Their season is rather late and they hold on well.

They proved good for distant shipment, as the report from Denver shows they had not been picked after July 3d at noon, then picking them the 5th, they arrived in fair condition in quart boxes, and sold at \$4.00 per crate of 24 boxes.

Brilliant—New Red Raspberry.

Offered by us after thorough tests on our ground. We offer it with perfect confidence. It ripens its fruit early and quick. The entire crop is ready for market while price is high. Berries large, beautiful, BRILLIANT, just as the name implies. Carries its bright, brilliant red to market and looks as fresh as when first picked. A great market variety. Our stock is limited, but we are offering to get it introduced. 10c. each; \$1.00 per dozen; — per 100: — per 1,000.

STOCK IS LIMITED. Get a start while it is still new.

Improved Cuthbert.

For several years past we have propagated the Cuthbert Red Raspberry from our very best bushes and now you have this variety far ahead of the average. If you need Raspberry plants, be sure and get some of L'Amoreaux's Improved Cuthberts, it is the leading market variety all over the country. Remarkably strong, hardy variety. Berries very large, measuring three inches around; conical, rich crimson, very handsome; so firm they can be shipped to far away markets. Price, 30c per doz; \$1.50 per 100; \$1.00 ^{per 100} per 1,000.

Loudon.

A red mid season berry. Large fruit, beautiful, rich, dark crimson color, good quality, very hardy, enduring winter without injury to the very tips. It stands shipping the best of any variety and will remain on the bushes the longest without injury. 40c per 12; \$2.00 per 100. *per 1000*

Herbert (Iron-clad Variety.)

New—A seedling found about 15 years ago, by Mr. Whyte, of Ottawa, Canada, and was sent out by him in 1896 to the Experimental Station for testing. It has undergone a thorough test beside all the older varieties, as well as all the later productions and has completely outclassed them all in hardiness. It has stood 30 degrees below zero without freezing. Fruit is bright red, somewhat oblong in shape. It is the largest of all red raspberries, larger even than the Cuthbert; sweet and juicy. Very best for table use. Enormously productive, outbears the Cuthbert and is a week earlier. Holds its size well to the end of the season. Price, 20c each; \$1.50 per 12.

Eaton.

A new red raspberry that is entirely distinct from all other varieties. In character of growth, in size, color, firmness and yield of fruit. In length of season, and in all strong points of merit it stands unequalled and alone. A variety that is at once perfectly healthy in root and foliage, and hardy—coming through our most severe winters in prime condition—a strong—"not tall and slender," but a sturdy grower, throwing out many laterals, and fruiting to the tips and from every lateral, a sight to see, an immense cropper, by far outyielding any red raspberry we have ever known, while the fruit is extraordinarily large and handsome, firm and of the highest quality. There is nothing better, being very large, solid and good keepers. Season lasting about six weeks. Can gladly recommend it to anyone wanting fine fruit. Price, 20c each; \$1.50 per dozen.

Three New Blackberries.

WARD-KENOYER-BLOWERS. Highly recommended by the best authority—Read description on other page—Send an early order and get a start now.

Black Cap Raspberries.

Eureka.

Ripens early with Palmer; fruit firm, of large size, equalling Gregg; superior quality, free from bloom, making it very attractive in fruit box; brings the highest market price. Strong grower, very hardy, healthy foliage, and in some localities stands at the head of productiveness. Price 30c. per dozen; \$1.25 per 100; \$10.00 per 1,000.

Cumberland.

In hardiness and productiveness it is unexcelled by any other variety. In size, the fruit is simply enormous, far surpassing any other sort. The berries run seven-eighths and fifteen sixteenths of an inch in diameter, and are of such handsome appearance that their fruit sold for 10c. per quart, when other varieties were selling for 5c. to 7c. per quart. In spite of its unusual large size, the fruit is possessed of its great firmness and is thus well adapted for standing long shipments. It follows Palmer and Sonhegan and precedes Gregg a short time, making it a mid-season variety. The bush is exceedingly healthy and vigorous, throwing up stout stock canes, well adapted for supporting their loads of large fruit. It has also shown itself remarkably free from that scourge of its family, anthracnose. Large growers report yields of two and three times as much per acre as Ohio, under same conditions, and far ahead of all other varieties. Price 50c. per dozen; \$1.50 per 100; \$12.00 per 1,000.

Munger.

Another season only proves the superiority of this grand new black cap. It is no doubt the very best of the late kinds. Fruit very large and firm, juicy and splendid for canning. Canes upright and strong growers. Fruit easily sells for 50c. per bushel advance over other black caps. An improvement over Gregg, which it resembles in cane and fruit. You can safely plant it for either home use or market. Price, 50c. per dozen; \$1.50 per 100; \$12.00 per 1,000.

Gregg.

Plants vigorous, hardy and productive; fruit above medium to very large; attractive black; firm and rather sweet when fully ripe; good to very good in flavor and quality, although not as productive as some other varieties. Price, 40c. per 12; \$1.50 per 100; \$10.00 per 1,000.

Kansas.

It is of the largest size, strong, vigorous grower, standing extremes of drought and cold and bearing immense crops. Early, ripening just after Palmer. Berries size of Gregg, of better color; jet black and almost free from bloom; firm, of best quality, presents a handsome appearance, and brings highest price in market. Price, 40c. per 12; \$1.50 per 100; \$10.00 per 1,000.

We can also furnish plants of Conrath and Palmer, two good standard varieties of Black Raspberries 40c. per dozen; \$1.50 per 100; \$10.00 per 1,000.

If you want Raspberry plants sent pre paid, add 10c. to dozen rate and 75c. to 100 rate.

The money making Raspberries for the large grower are: Kansas, Cumberland, Munger, Haymaker, Cardinal and London.

Send us a list of fruit growers in your vicinity, and we will mail you some plants for your trouble.

Blackberries.

We excel in growing fine Blackberry plants. Our assortment is large. Our plants are mostly root cuttings and as fine as can be grown. You will make no mistake in ordering your Blackberries of us, as both our price and stock are right. If you want Blackberry plants sent by mail or express prepaid, add 10c to dozen rate, and 75c to 100 rate. Remember we prepay charges on orders for berry plants to the amount of \$4.00 to points within 1000 miles of us.

Blowers.

The giant of all Blackberries, found in Chautauqua county, N. Y., some fifteen years ago. An upright grower; very hardy and enormously productive. Large, glossy and luscious berry. One fruit grower said that it had not failed with him since it commenced to bear nine years ago. A single plant produced 2,694 berries. It commences to ripen about the middle of July and bears for a long time. Fruit is very large and of good quality. In 1905, Mr. Blower, the originator, sold his crop in Buffalo, for \$3.52 per 32 qt. crate, or 11c per quart. In 1906 the crop was sold for \$4.00 per bushel. The bushes are so tall and strong that they can carry a great crop. Price, 2 for 25c; ~~per doz.~~ per 12; per 100.

Hon. John S. Lambert, Supreme Court Judge:

"I saw a sample of Blackberry bush known as the Blowers Blackberry, something over 13 feet high and loaded with the most delicious fruit I ever saw. It was a surprise both in the size of the bush and berry, as well as quantity of fruit, as I had never seen or heard of anything that approached this display. In my opinion it will absorb all other varieties."

Mersereau.

This early mammoth, ironclad Blackberry is by far the most valuable variety that has appeared in recent years. It originated in northeastern New York, where the mercury falls from 15 to 35 degrees below zero, and where it has stood in open field culture for many years without the slightest protection, never being injured in the least. It has never had a leaf affected with orange rust, blight or other disease. In quality, it is exceptionally sweet, rich, melting and luscious, being without core; the seedy character of Snyder and most other sorts is noticeably absent. As a shipper and keeper it is unsurpassed, remaining firm without "bleeding" in handling. The yield is simply enormous, producing double the quantity of fruit per acre of the Snyder, which is considered the standard Blackberry. Its season is early to midseason, ripening with Snyder, in advance of Taylor's Prolific, but not so early as early King. Price ~~6~~²-c per doz; \$~~2.00~~^{2.50} per 100 \$ — 1,000.

Snyder.

An old variety: plants vigorous to very vigorous, healthy; canes large, upright and hardy. Fruit medium, roundish. A valuable standard commercial variety, and grown in many places on account of its hardiness, although the berries are inclined to be rather small, but if you keep the soil rich with barnyard manure and wood ashes, no one will complain of the size. Price, 40c. per 12; \$1.50 per 100; \$10.00 per 1,000.

Ohmer.

Late market variety; vigorous; canes rather large with but few prickles; productive. Fruit above medium roundish; juicy, rather acid even when fully ripe; good flavor and quality, although not as productive as some varieties, but it has made a fairly good record on our farm. Price 60c. per 12; \$2.00 per 100.

Early Harvest.

Earliest to ripen. Fruit medium size, glossy black, very juicy, fair to good flavor and quality. Valuable on account of its earliness. Price 40c. per 12; \$1.50 per 100; \$10.00 per 1,000.

Eldorado.

One of the hardiest; fruit medium to large, sweet and juicy; good color; excellent in flavor and quality. Has made a good record in many parts of the country as a commercial variety. Price 60c. per 12; \$2.00 per 100; \$15.00 per 1,000.

Rathburn.

The berries are large, larger than Kittatiny, of an intense jet black, very glossy and of permanent color, never turns red, without any hard core, small seeds, extra fine quality, with a peculiarly rich aroma, and sufficiently firm to carry well to market. It is in the habit of plant, however, that this variety differs from others. The plant suckers very little; it makes a strong, upright main stem, from which the branches start out long and drooping.

It is not a dewberry, as one might suppose from this description, but simply a blackberry with a trailing habit; its central stem is as erect and stout as that of any other blackberry. It forms a compact bush of four to five feet high, with canes much less thorny than other varieties, and yield abundantly. In the matter of hardiness it has been well tested at its home, where it has safely endured a temperature of 15 to 18 degrees below zero without injury. It ripen early—about with the Wilson. All who want a large blackberry of the highest quality should certainly try this. Price, 10c each; 75c. per dozen; \$3 per 100.

Lucretia Dewberry.

Claimed to be the best of the blackberry family. As hardy as Snyder; as productive as any. The berries are far larger and incomparably better than any blackberry, and of unequalled excellence; soft, sweet and luscious throughout; of brightest, glossy black color. The Lucretia Dewberry has received the endorsement and highest praise from the best horticulturists in the country. Price, 25c. dozen; \$1.00 per 100; \$7.00 per 1,000.

Ward Blackberry.

We quote description by a very prominent horticulturist who accompanied a committee from the New Jersey State Horticultural Society on a trip to the home of the Ward to look into the claims being made for it. "It was the most astonishing sight I have ever seen. Hedge rows were six feet apart, canes standing 4 to 4 1-2 feet high and some 2 1-12 feet wide across, and the tops were such a solid mass of green, red and black berries as to almost exclude the foliage from sight. The ripe ones were big, glossy black fellows, fully one-half larger than Snyder, rich, sweet, tender and melting, with no hard core at the center. One-third of an acre in 1902 yielded 47 bushels and about 60 bushels in 1903, or an average of over 160 bushels per acre, which sold at 10 cents per quart wholesale in the low-priced New Jersey markets. This made \$544 per acre, which must have meant at least \$350 per acre profit. The canes are very hardy, never one having been known to winter-kill. A perfect blackberry is Ward; Ward is a good shipper; perfectly hardy canes; no superfluous sprouts or canes; a great yielder of large black berries; rich and sweet—no hard cores; fruit all on outside, easily harvested. Price, 10c. each; 75c. per dozen, \$3.00 per 100.

8 plants each of above 10 var. for \$2.00 prepaid.	

Early King.

An extra early and exceedingly hardy variety of great merit. Canes of strong growth, as hardy as Snyder, and very prolific. It is larger and earlier than Early Harvest, and its delicious sweetness renders it of special value for the home garden. It is also free of double blossoms, rust or other disease. It has been thoroughly tested at the North, and has given very general satisfaction. Highly recommended by the experiment stations. Growers coin money on this variety on account of its hardiness, large size and earliness. The best large berry ever grown. Many dealers send out Early Harvest plants for this variety as the genuine stock is very scarce. Our plants are fine and true to name. Be sure to add it to your collection. Price, 50c. per dozen; \$2 00 per 100; \$15.00 per 1,000.

Ancient Britton.

One of the best of hardy varieties; in Wisconsin and other northern states, is superseding all other kinds; without booming, has worked its way on its own merits to the highest place as a profitable and valuable sort. Very vigorous, healthy and hardy, producing large fruit stems, loaded with good-sized berries of fine quality that carry well and bring highest price in market. For general planting for home or market in all sections subject to severe winters, the Britton is recommended as a first-class variety. Price, 30c. per dozen; \$1.50 per 100; \$10.00 per 1,000.

If you need One Thousand or more of any variety of Raspberry or Blackberry plants and the price is not given herein, please write and we will gladly give you our best figures.

Kenoyer.

A Kansas product. Whenever Kansas does anything she does it right, so it is needless to say Kenoyer is what is claimed for it. It has fruited here on 172 plants, and bears out the claims so far. It is a good grower and produces a fine, showy berry with good strong cane. The introducer says:

Maj. Frank Holsinger, the wellknown horticulturist, says: "Among blackberries the Kenoyer is a berry of great promise. It is early, a prodigious bearer, and of good color, with good shipping qualities. I am well pleased with the Kenoyer. From present appearances they are twice the size of the Early Harvest."

"I have now fruited it eight years and it has never failed to show up far in the lead of all other varieties for this section. The past season has been a very discouraging one for the berry grower. In the north the preceding cold winter killed blackberry canes to the ground, while farther south the cold, wet summer caused berries to be undersized and sour, and the continued rains prevented harvesting the crop. My Kenoyer Blackberries were greatly damaged by hail, and many crates were lost because of beating rains during the ripening period. Notwithstanding all this, I picked and marketed 250 crates of berries from 2½ acres, which was more than twice the yield per acre of my Early Harvest. The berry has now been tested over a large section of country. Price, each 15c; per dozen; / per 100.

When you buy our Nursery Stock you deal directly with the growers. You have a great advantage over those who buy through agents or middlemen. Our stock is fresh and packed with great care and will give better results than stock that has been carted around all day in an open wagon exposed to the sun and air.

Currants.

The London Market.

A new Currant of merit—the money maker and sure cropper. Price within reach of all. Read description from its home—Michigan.

The London market is by all means the most profitable currant to grow. It sells for half more and produces almost double the fruit of any other variety. More will be set in Michigan this year than any other sort. The fruit is large, fire red, and clusters fine.

As a money-making market currant, we believe this variety of currant has no equal. It was first grown in this country by Henry Bowles, of Michigan.

The London market is a good grower, and early bearer, enormously productive, and holds its leaf until the snow flies. 10c each; \$1.00 per dozen.

The Wade Brothers, Michigan, picked 90 cases of fruit from 300 three-year-old plants of this variety. Hon. Rob. Graham, Michigan, says: "The London market is of satisfactory size, a strong grower, and enormous cropper."

Fay's Prolific.

This is a very prolific currant, and is well known as one of the very best red currants. The bush and the berry are both very large. 10c. each; 75c. per doz.

Red Cross.

Jacob Moore, the originator, says: "Red Cross clusters are long and have well-necked berries, double the size of Victoria, and far superior in quality to Cherry or Victoria. Nothing will compare in quality with Red Cross but White Dutch, which is so small. Red Cross was first fruited in 1889. Have seen the fruit growing in such masses as to hide the upper branches from view. It is later than Cherry. The plant makes twice the growth of Cherry and yields two or three times as much fruit. We recommend it with confidence. We consider Red Cross one of the best of the new currants." Price 15c. each; \$1.00 per dozen; \$6.00 per hundred.

North Star

Has proved to be hardy wherever tried without a single exception. Single berries of that short-bunched Cherry Currant can be grown a larger size than the North Star, but the average bunches of the latter are much heavier, while in quality the fruit is less acid and more agreeable to eat out of the hand than the Cherry or any other variety. In quality it is nearer the flavor of the Red Dutch than any other variety. Price, 10c. each; \$1.00 per dozen; \$5.00 per hundred.

Versailles.

A currant of great beauty, as bunches are long and berries are large size and excellent quality. Price, 10c. each; 75c. per dozen; \$4.00 per hundred.

Cherry.

Strong grower; fruit very large, sometimes measuring one-half-inch in diameter. Price, 10c. each; 75c. per dozen; \$4.00 per hundred.

<p><i>Mail orders we make a specialty and it is our aim to send just as good plants by mail as by freight or express.</i></p>

Red Dutch.

Berries medium; profuse bearer; bush very strong grower, and comparatively free from borers. Price, 10c. each; 75c. per dozen; \$4.00 per hundred.

Victoria.

Large; bunches long; berries bright red color of excellent quality; bush good grower; extremely hardy. Perhaps this is the best of the older varieties of currants. Price, 10c. each; 75c. per dozen; \$4.00 per hundred.

Perfection.

This new variety is claimed to beat them all. It won the Barry Gold Medal of the Western New York Horticultural Society. The color is a beautiful bright red, and the size is as large or larger than the Fay's Prolific, clusters averaging larger. It is a great bearer, superior to any other. It is necessary to keep the plant well cultivated and fertilized, as it is a heavy producer. The season of ripening is about the same as Fay's Prolific. Quality rich, mild sub-acid; few seeds. Growth is very vigorous, and foliage is very healthy. Price, 25c. each; \$2.50 per dozen.

Gooseberries.

Price, 15 cents each, \$1.00 per dozen; \$5.00 per hundred.

Chautanqua

Large, light yellow, excellent quality, very vigorous and fruitful.

Columbus

New American sort of largest size, greenish-yellow and finest flavor. Vigorous, productive and free from mildew.

Downing

Large, light green, good and prolific. One of the best for family or market.

Houghton

Medium size, pale red, tender and good. Very productive.

Red Jacket

Large, red, free from mildew. A great cropper. One of the best.

Smith's Improved

Large, light green, sweet and excellent. Plant healthy and hardy.

The Grape.

Our Grape vines are strong, well rooted plants and have always given entire satisfaction. Price, 15c. each; \$1.50 per dozen; \$ per hundred. If you want Grape vines sent prepaid add 1c. for each plant.

Moore's Diamond.

A prolific bearer, bunches large, handsome and compact, slightly shouldered, color delicate, greenish white.

Eaton.

The bunches are very large, compact and shouldered. The fruit is enormous, black and handsome in appearance.

Agawam.

Red, berries large, skin thick, flesh pulpy, meaty, juicy, rich.

Brighton.

Red, berries medium, skin thin, flesh tender, sweet.

Catawba.

Dark red, berries large, rich flavor of best quality.

Pocklington.

Pale green, berries very large, flesh juicy, sweet, with considerable pulp, and foxy.

Concord.

Black, early berries, large, flesh juicy, sweet.

Worden.

Black, skin thin. It is superior to the Concord. It is better in quality, larger berry, ripens from five to ten days earlier.

Moore's Early (Black).

Bunch not quite as large as Concord, but berries larger and very much like it in flavor and quality. Produces a heavy crop. Ripens very early and is nearly out of market before Concord is ripe, and hence brings a comparatively high price.

Delaware.

Red, bunch small, compact, berries small, skin thin but firm, flesh juicy, very sweet and refreshing, of best quality for both table and wine.

Niagara.

White, bunch very large and handsome, berries large, round, skin thin, melting, sweet, ripens with Concord.

Campbell's Early.

The vines hardy, vigorous growers, with good, strong healthy foliage. Very productive of large handsome clusters; of most exquisite flavor; the berries are round with a delightful bloom; color is black, the skin is thin, but firm.

Wyoming Red.

The earliest good red grape we grow: bunch small, skin bright red, fruit sweet.

Wilder.

Ripens with Concord. Bunch and berry very large; vine vigorous and prolific. One of the best black varieties.

TWO-THIRDS NATURAL SIZE.

KANSAS

THE

..Frost..

..Proof..

Raspberry

IT stands the extremes of our climate and bears a full crop every year. Other kinds by its side are frozen to the ground while the Kansas comes through unscathed. **WE STAKE OUR REPUTATION** on this berry of all berries for hardiness, productiveness, quality, and **PROFIT**. It has been thoroughly tested from the Atlantic to the Pacific, and from the Gulf of Mexico to British America.

READ WHAT IS SAID OF IT:

BENTON GEBHART, OF BENTON HARBOR, MICH., says: "In fruiting the Kansas again the past season it has positively proven the best raspberry in cultivation. I have them alongside the Palmer, Nemaha, Lovett, and others and is far superior to them all. Its three great points are its vigor of stocky canes and great growth; its immense size and productiveness of fruit; extra fine quality, which no other can compare to. My family will use nothing else but the Kansas, on account of its fine flavor. It has stood the extreme drouth well and ripens its fruit early."

S. B. GREEN, ST. ANTHONY PARK, MINN., says: "In my experience the Kansas is the best early raspberry in this section of country. I like it much and will plant more."

M. A. THAYER, SPARTA, WIS., says: "The Kansas is a grand berry; large, early and a great shipper. Canes vigorous."

CHAS. MILLS, FAIRMOUNT, N. Y., says: "The Kansas beside Palmer, Lovett, Johnstons Sweet, and Ohio was head and shoulders above them all. It did not seem possible to me there could be so much difference in growth."

A. L. WOOD, ROCHESTER, N. Y., says: "The Kansas again did remarkably well with me this year. It is the only blackcap that did not winter-kill or blight with me out of 15 varieties."

GEO. GIBBS, ORCAS, WASHINGTON, says: "In this climate the Kansas is simply perfection. It proves larger than the colored plate. It is a prolific bearer, very firm, and a good shipper."

T. V. MUNSON, DENNISON, TEX., says: "Kansas is a very large excellent fruited blackcap. One of the best for a hot dry climate."

Never fails to give satisfaction in all sections and under all conditions.

Kansas, . . . The King Among . . . Black Raspberries . . .

This excellent berry originated at Lawrence, Kansas, and is of sterling merit, excelling in the following strong points:

SIZE OF BERRY.

VIGOR OF GROWTH.

HARDINESS OF VINE.

FREEDOM FROM LEAF BLIGHT AND MILDEW.

FLAVOR EQUAL TO THE BEST.

EXCELLENT SHIPPING QUALITIES.

UNIFORM AND PROLIFIC BEARER.

For home use or market has no superior, and should be grown by every one who can find room for it.

The Green Mountain Grape.

It stands at the head of the list for earliness good bearing and vigorous, healthy growth. The berries of medium size; color greenish white, skin thin, and leaving no unpleasantness whatever in the mouth when eaten. Price, 25c. each; \$2.50 per dozen.

We have in stock extra heavy three-year-old vines of varieties described above that will bear fruit first season after planting. Price, 35c. each; \$2.00 per dozen. Our stock of these bearing vines is limited.

Asparagus.

The Best Early Vegetable.

The first vegetable of the spring. This healthful fruit should be included in every garden. Plant in rows about three feet apart and one foot apart in the row. Have the soil well spaded and forked over. Better results will follow if some manure has been added. Make a trench or furrow and plant by laying the roots against one side of the trench, let the roots run down as far as they will go and spread somewhat, with the crown of the plant about four inches below the surface of the ground, haul some soil to the plant so as to hold it in place, then fill trench with a hoe, covering the crown but slightly at first. As the new shoots come up you can fill up the trench and cover over the crown. About the first of September the tops should be cut off and the bed cleaned of all weeds, etc. Later on and before winter sets in the bed should be covered with three or four inches of coarse manure. This will enrich it as well as protect it. The next spring this covering can be forked in. When once established a bed will last for a great many years. The net income is usually from \$100 to \$400 per acre. Our plants are extra fine and large and we would be pleased to fill your order for any quantity you may be in need of. Price of good strong one-year-old plants 25c. per dozen; 75c. for 100; \$ per 1,000. Price of strong two-year-old plants 35c. per dozen; 90c. per 100; \$ per 1,000. We prepay postage at dozen rates.

Palmetto.

This is the leading variety at the present day, more of it being planted than any other single sort. It is considerably larger than the Conover's, the old reliable standard variety for so many years, is fully as early and as productive, while the flavor is unsurpassed.

Barr's Mammoth.

Another valuable acquisition to the Asparagus family, a variety highly praised and well thought of wherever grown; nearly double the size and much more productive than Conover's; ripens a few days in advance of the Palmetto.

Giant Argenteuil.

The finest and most profitable of all Asparagus. Stalks of mammoth size, bright and attractive; in quality sweet and tender. It yields immensely and is very early; it is a French variety and has proved a great money-maker wherever planted.

Columbian Mammoth White.

In addition to the marvelous advantage of its white color, the Columbian Mammoth White Asparagus is even more robust and vigorous in habit, and throws larger shoots and fully as many as the Conover's Colossal.

Only young, well-rooted
plants are sent out, and we
never dig from an old bed.

Rhubarb or Pie Plant.

This deserves to be ranked among the best early products of the garden. Continues long in use, and is valuable for canning. Make ground rich and deep; plant four feet apart. Price, 20 cents each prepaid; \$1.25 per dozen.

Myatt's Linnaeus.

An early, tender plant, not in the least tough or stringy; of mild, sub-acid flavor. It is the finest large red market variety.

Carnation.

Mammoth Flowering Carnations.

We regard these glorious flowers as the most admirable of all plants for the window. We have spared no pains in securing the best varieties in the country to propagate from. The plants are of compact and robust growth, and profuse bloomers of large, fragrant flowers, two to three inches across. Our pot plants will make excellent plants for autumn and winter blooming. We have them in the following colors: Rose, white, pink, scarlet, crimson, yellow and striped or variegated. All are excellent. Price, 15c. each; 4 for 50c. prepaid; 12 for \$1.00 not prepaid.

Roses.

Fine two-year old stock, blooming size. Our list includes the leading hardy varieties of Ramblers, Climbers, Hybrid-Perpetual and Moss Roses. See description of varieties in General Catalog. Price, 30c. each prepaid. \$2.50 per dozen, not prepaid.

Shrubs, Etc.

Hardy Hydrangeas, Spieas, Syringas, Clematis and Wistaria. Price, 30c. each prepaid.

Fruit Trees.

All budded trees on whole roots of imported French seedlings.

Apple Trees.

Choice Apple Trees, $\frac{3}{4}$ inch and above, 5 to 7 feet, 20c each: \$2.00 per dozen. Medium size, slightly under $\frac{3}{4}$ inch, 4 to 5 feet, 15c each: \$1.50 dozen.

Pear Trees.

Choice Pear Trees, $\frac{3}{4}$ inch and above, 5 to 7 feet, 25c each: \$2.50 dozen. Medium size, slightly under $\frac{3}{4}$ inch, 4 to 5 feet, 20c each: \$2.00 per dozen.

Plum and Cherry Trees.

Choice Plum and Cherry Trees, $\frac{3}{4}$ inch and above, 5 to 7 feet, 35c each: \$3.50 per dozen. Medium size, slightly under $\frac{3}{4}$ inch, 4 to 5 feet, 30c each: \$3.00 dozen.

Peach Trees.

Choice Peach Trees, extra large, 5 to 7 feet, 22c each: \$2.25 per dozen. Standard size, 9-16 inch and above, about 5 feet, 20c each: \$2.00 per dozen. Smaller size, about $\frac{7}{8}$ inch and 4 feet high, 15c each: \$1.50 dozen.

Apricot, Quince and Mulberry Trees.

Choice Apricot Trees, 30c each: \$3.00 dozen. Choice Quince Trees, 40c each: \$4.00 dozen. Mulberry Trees, 40c each: \$4.00 dozen.

We grow large quantities of Ornamental and Shade Trees, such as Carolina Poplar, Silver Maple, Cut-leaved Maple, Cut-leaved Weeping Birch, etc. Prices very reasonable.

Success With Strawberries.

Do you know the real importance of setting good plants? Set good plants and get good results for your labor. We grow millions of Berry Plants annually and they are all good. Why? Just because we know how to grow them to have them good and full of life and vitality. In the first place our soil is of the right kind to produce those long, heavy roots that go to make a good plant. We never propagate from an old bed. Always select new grounds and start with strong, healthy plants. In this way we run our plants "up" instead of "down" or out. It is just as important that you use plants that are not "run out" as it is to use seeds that are not "run out." Then, last of all, we cover our beds in the fall to protect the roots from freezing. A great many plant growers never cover their beds for winter, and the result is, a lot of **FROZEN ROOTS**. Plants that have frozen roots, frozen from the crown down part way, will never give you a satisfactory bed. The lower parts of the roots that haven't been frozen will sustain life in the plant for some time. Some will even last all summer making very little growth, but will never thrive and throw out the runners that a perfect plant will. What you want is plants that are perfect, to start with, taken from a young and healthy propagating bed that has been well protected during winter. Then your success is assured. If you want a nice garden patch or a large market patch, we can furnish you the plants that will start you right. A trial of our stock will convince you that we grow good plants. We challenge the world to produce better.—One of our customers said: "Last year I bought 100 plants from another nursery, about half of them never started at all, and by the 1st of August they were all dead. The plants I got of you this year have completely covered the ground. I did not lose a plant."
